GENERAL INSTRUCTIONS

PITCHING

NO STARTER GOES LONGER THAN 11.2 INNINGS

J. Beckett should pitch until giving up 4 runs then go to the pen. Try to get 6 innings from all of the other starters. In the 6th when score is -2/+3 and one run has scored go to the pen, 7th inning when first runner gets in scoring position go to the pen. The bullpen has enough innings but is not strong.

Any starter pitching a shutout stays in until he is scored on.

RELIEVERS:

S. Burnett and **Kohn** are the closers. They pitch in save situations. **S. Burnett** can come in the 8th for the last out of the inning and then pitch the 9th.

C. Durbin and **F. Salas** are the set up pitchers and come in as early as the 6th. They can pitch two innings per appearance.

Delcarmen, **Es. Vasquez**, **Harrison** and **Jor. Smith** are the late inning relief pitchers. They can come in to pitch in the 5th through the 8th inning. At least 2 will be up each month.

Harrison does not relieve in the months he starts.

M. Mateo and **Nieve** are the middle relievers. They can pitch from the 3rd inning through the 6th.

D. Beaz and **Fulchino** are the early relief pitchers. They can pitch in blow out situations, from the 1st inning on. They can also be used late in the game when the starter has fatigued and the lead is 5 or more runs. If the lead shrinks to 3 runs or less then bring in the usual set up pitchers or the closer.

BASE RUNNING/STEALING

All (F) players will try for the extra base. Send runners in the 1st-3rd inning when adjusted number is 27+, in the 4th-6th inning adjusted number 26+, in the 7th inning through the end of game adjusted number 24+. Any question or doubt, consult the Adams chart. In the computer game send any runner who is "well around" the base.

STEALING

No steal attempts when behind or ahead by 4 or more runs

Andrus, **Bloomquist**, **Coghlán**, **Rasmus** and **V. Wells** are the most eligible runners. Use the steal any time to get the game tying or go ahead run into scoring position from 7th inning on. **Andrus** should try for 1 steal per series. Also see Hit and Run.

HIT AND RUN

The players doing the running can be: [Andrus](#), [Bloomquist](#), [Coghlan](#), [Ramus](#), and [V. Wells](#). Also [Byrd and Milledge](#) can be used in critical situations. I prefer this option over the straight steal.

DEFENSE

Hold all (F) runners with less than two outs. Do not hold any player who cannot steal. In the 1st thru 6th inning play the infield deep to go for double play
From the 7th inning on play the infield in to try and cut off any runs to keep the score within +3 or -3 runs.
Always use the highest rated player as replacement in case of injury or pinch hit.

SACRIFICE

Sacrifice from the 6th inning or later to get the game tying or winning run into scoring position.

NO SQUEEZE PLAYS

PINCH HITTING/PINCH RUNNING

Pinch hit from the 8th inning on when the game tying or winning run is in scoring position. Use best available batter off the bench who puts pitcher at greatest disadvantage.

Pinch runner should be an (F). Use any available position player first then any (F) starting pitcher. There may be times when an (F) is not available as most will already be in the starting lineup. If that's the case then use the highest speed available. Only pinch run when it represents the game tying or winning run.

DEFENSIVE REPLACEMENTS

C- Ruiz, Schneider, Rob Johnson
1B- K. Morales, Bloomquist
2B- Janish, Bloomquist
SS- Janish, Peralta, Bloomquist
3B- Janish, Bloomquist
OF- Milledge, Coghlan, Bloomquist

*******Consult monthly instructions for any changes and to verify who's up and who's down. *******
